DESCRIPTION

MAGNETIC DIN / ISO 15552

The Series 61 has been designed to comply with the dimensions laid down in the DIN / ISO 15552 standards. The extruded aluminium tube, with improved aesthetics, has two grooves (on three sides), where the proximity switch Model SKR can be directly mounted. This enables the same cylinder dimensions to be retained. Four tie rods, located inside the tube, make the mounting of the end blocks extremely secure.

FOOT OPERATED PEDAL VALVES

DESCRIPTION

The pedals can be supplied in either the pneumatic or electrical foot operated version. The pneumatic type is available with a 5/2 valve and 1/4" front ports, which allow the fittings and silencers to be assembled conveniently on the front face. A 3/2 operation can be obtained by closing an outlet port. The electrical type is available with a single pole changeover contact microswitch and a front wire outlet (PG9). The pedal can be operated as bi-stable or monostable, by switching the selector placed under the small red protection flap.

QUICK EXHAUST VALVES

DESCRIPTION

Quick exhaust valves are commonly used to increase the speed of cylinders or for rapid depressurisation of tanks containing compressed air. The models VSO 425 - M5 and VSO 426 - 04 are specially designed for mounting on solenoid valves and valves incorporating a ø4 cartridge. We recommend mounting a silencer on the outlet.

DESCRIPTION

C-Truck fittings have been designed for use in the pneumatic braking system on commercial vehicles. They have been designed to allow quick tube assembly and disassembly without the need to remove the fitting. The fittings have a protective cover to keep humidity and dirt away from the collet. The insert gives the tube dimensional stability even when there are extreme changes in temperature.
